

Doctor of Medicine (90850) Satisfactory progress - <http://handbooks.uwa.edu.au/courses/coursedetails?id=c337>

6. Supplementary to the Doctor of Medicine course rules is this document governing what constitutes satisfactory progress in the course and what rules are applied in cases of unsatisfactory progress:

Satisfactory progress – Supplement to the Doctor of Medicine (90850) Course Rules – for 2018 Student Cohort

To make satisfactory progress in a calendar year a student must pass all units that the student is required to undertake in that year. If the student is eligible for supplementary assessments, the marks must be available at the time of the relevant Board of Examiners meeting for consideration of student progression.

For students identified as having difficulties, these rules assume that appropriate support has been provided, and that reasonable adjustments to teaching, learning and assessment have been implemented if appropriate. Independent of the MD Course Rules, progression in the Course may also be affected according to UWA regulations on student conduct and discipline. The marks obtained by students are final marks after standard setting and post-examination moderation. Due to the standard setting process, no conceded passes will be permitted. Marks will be rounded to the nearest whole percentage value. Details on the professionalism and attendance assessment are provided in the relevant guidebooks.

Supplementary assessments will not be granted to a student who—

- a. fails 2 or more units in a calendar year
- b. fails a Deferred or supplementary assessment; or
- c. has a progress status of 'On Probation'.

Students undertaking the Scholarly Activity Coursework stream will be bound by those respective unit rules. Students repeating a semester or year will be eligible for credit for Scholarly Activity units in that semester or year if the mark is 70% or above in those units. Despite credit being given for Scholarly Activity Research or Service Learning Units, students required to repeat a year will have continuation in these streams considered on a case-by-case basis according to ongoing availability of projects and supervisors. Students may be required to complete their credit point requirements by enrolling in Scholarly Activity – Coursework units.

Independent of the MD Course Rules, progression in the Course may also be affected according to UWA regulations on student conduct and discipline.

Abbreviations

PBA = professional behaviour assessment and attendance	SG = supplementary assessment granted
FC = failed component	PS = pass supplementary assessment
OSCE = Objective structured clinical examination	FS = fail supplementary assessment
